Professional Experience

Roblox Corporation — *San Mateo, CA*

SENIOR SOFTWARE ENGINEER — *March.2025 - Present*

- Design and implement highly scalable, real-time logging system using Kafka, Elasticsearch, and Kibana, enabling comprehensive end-to-end production visibility
- Deploy and Manage Self Hosted Open-Source Sentry for error tracking and monitoring as a infra platform for the company
- Build and maintain MCP server infrastructure enabling seamless communication between AI agents and observability systems, improving monitoring efficiency and data flow
- Build and maintain cloud-native monitoring and alerting platform on Kubernetes using Helm, Prometheus, and Grafana, providing real-time operational insights and proactive issue detection
- Develop and optimize ETL pipelines with FluentBit for data scraping, enrichment, streaming, and ingestion, improving data flow and observability across the platform

Fanatics, Inc — *San Mateo, CA*

SENIOR PLATFORM ENGINEER — *July.2018 - March.2025*

- Designed and developed a scalable, highly available real-time logging system using Zookeeper, Kafka, Elasticsearch, Graylog, and Druid for end-to-end production logging
- Built cloud-native monitoring and alerting platform in Kubernetes with Fluent-bit, Helm, Prometheus, and Grafana for real-time insights and proactive issue resolution
- Created ETL pipelines using Vector, Redpanda Connect, and FluentBit for data enrichment, streaming, and ingestion
- Improved scalability and reliability of real-time production services managing large datasets across cloud and on-premises environments
- Developed data-intensive services with cloud and on-premises infrastructure, leveraging expertise in data processing, storage, and analytics
- Optimized the end to end logging pipeline, reducing infrastructure costs and operational overhead, resulting in annual savings of over $2.3M

State University of New York at Binghamton — *Binghamton, NY*

RESEARCH PROJECT ASSISTANT — *May.2017 - August.2017 & December.2017 -June.2018*

- Optimized virtual machine performance by implementing virtual CPU scheduling and process pinning techniques, resulting in improved resource utilization and reduced overhead
- Enhanced hypervisor efficiency by developing a live replacement mechanism, minimizing hypervisor involvement in virtual machine operations and improving overall system responsiveness

State University of New York at Binghamton — *Binghamton, NY*

GRADUATE TEACHING ASSISTANT — *August.2017 - December.2017*

- Conducted research to improve virtual machine performance with increasing virtual CPU counts, exploring techniques for efficient resource allocation and utilization
- Taught and mentored students in Operating Systems and Systems Programming courses, conducting classes, exams, and grading assignments

Evry India Pvt Ltd — *Bangalore, India*

SOFTWARE ENGINEER ASSOCIATE — *July.2015 - July.2016*

- Designed and developed full-stack applications using C#, ADO.NET, MVC, JavaScript, and HTML, building scalable REST APIs and intuitive user interfaces for a seamless user experience

Technical Skills

Programming Languages	Python, Java, Go, C, C#, Shell
DevOps & Infrastructure	Git, Amazon Web Services, Docker, Kubernetes, Helm, Nomad, Github Actions, Gitlab
Data Streaming & Messaging	Kafka, Kafka-Stream, Zookeeper, Vector.dev, Fluent-bit, Redpanda-Connect, Logstash
Monitoring & Observability	Elasticsearch, Kibana, Graylog, Prometheus, Grafana, Druid, Sentry
AI Tools	Cursor, Claude Code, Codex, Opencode

Publication

Overcoming Virtualization Overheads for Large-vCPU Virtual Machines — *Milwaukee, WI*

Authors: Ozgur Kilic, Spoorti Doddamani, Aprameya Bhat, Hardik Bagdi, Kartik Gopalan — *September.2018*

- Published at ”2018 IEEE 26th International Symposium on Modeling, Analysis, and Simulation of Computer and Telecommunication Systems”

Education

State University of New York at Binghamton (Binghamton University) — *Binghamton, NY*

Master of Science in Computer Science

Visvesvaraya Technological University — *Mangalore, India*

Bachelor of Engineering in Computer Science
